Find the Hidden Revenue In Your Business For Chambers and Community Economic Development Directors Target: Small Business Owners

Your local small business owners are not making enough money. Let's help them.

Look around, how many of your local businesses have closed their doors in the past 5 years? Small Business Owners (SBOs) get so caught up in the daily grind of running their business, taking care of customers, employees, worrying about payroll, and paying the bills, they don't have time to figure out how easy it can be to increase their income. I know it's true, because it was true for me when I first became self-employed and it took me 17 years to figure it out.

Book the half-day workshop, **Find the Hidden Revenue in Your Business**, for your local small business owners:

Every business owner has revenue streams in their business they have either forgotten about, don't see, or don't have the time to implement. Countless (SBOs) close their businesses because they don't make enough money. While I can't see dead people, I can see revenue potential, it's my "sixth sense."

What if I could show your SBOs where they are losing money in their business?

What if I could show your SBOs the revenue stream(s) they can't see in their business?

It's a good investment in your community to help your local small businesses so they can hopefully avoid bankruptcy and keep their doors open. More people than just the business owner suffer financially when a SBO files bankruptcy; the landlord, taxes are left unpaid, employees are unemployed, and so on and so on.

When a SBO thrives and makes more money, they put it back into the local economy, they create jobs, and the local government gains more tax dollars. A true, win/win.

Earl Nightingale said, "We become what we think about." and suggested we do a "30 day test" to prove it to ourselves. I wrote the 30 day test Earl Nightingale talked about. This book is that test.

Those that have put through this program, have had wildly crazy success, in achieving their 30 day goal.
